1. Forums

One of the best ways you can drive traffic to any website, is using Forums.

If you don't know what a Forum is, then the best way to learn is to join one.

Basically, a Forum is an online community where people can have discussions about various topics they all have a common interest in.

So how would a Forum get traffic to your website?

Well you would have to find a forum related to your website content, a simple search on google for "your subject forum" would return a list of forums where people are interested in that subject or niche.

Now once you have a list of forums, you register so that you are allowed to make comments or "posts" on the forum.

When you make a post on a forum most allow you to have a signature box under each post. This signature is your ticket to free traffic.

Your signature has to be catchy and attention grabbing, so that people will click on it and visit your site.

One tip to remember, if you join all these forums and start posting blatant advertisements for your website it will be considered to be spamming the forum.

If a forum allows you to advertise your website then there will be a dedicated category for your links.

Your intention is to read posts and give forum members advice.

The more times you help forum members the more you will be recognised as an expert in that field and that in turn will drive forum members to visit your website.

There are many great techniques from getting the most out of forums and cashing in on them, if you would like to know more about forum marketing I highly suggest you watch a copy of Forum Marketing Training Video, you can find details of how to get a copy on this page [Forum Marketing Success](#).

2. Articles

Articles are a HUGE way to get traffic as well as links back to your website.

You write an article related to your website content and submit it to Article Directories online.

You are allowed to have an Author's Bio (Biography) Box. This is a few lines of text at the end or underneath your article content.

Your authors bio box is a short description about you as the author but you can also add a link to your website. Then when someone reads your article online and enjoys it, they will click the link to visit your website.

Again, like your forum signature, you want your bio box to be attention grabbing. Perhaps you could give away a free report on your website, or offer a special deal or discount.

If you can't write articles, you can always get some 'Private Label Rights' articles.

PLRs are pre-written articles that you can buy, complete with rights to edit, give the article a new title and promote yourself as the Author.

You get the source word document, not PDF, so you can amend the articles in any way you like, then submit them to article directories.

To discover more ways to cash in on articles visit this page

<http://www.inside-ebooks.net/guides/articlecash.html>

As I primarily sell ebooks, I wrote an article on 15 steps to a successful ebay ebook business, and my author's bio box was many variations of this...

Sally has been successfully selling ebooks online for 2 years. Grab a FREE download of her new ebook titled "50 steps to a successful eBay eBook Business here [Inside Ebooks Blog](#).

Now once the person has read the 15 steps and realised the information was really helpful, they will in turn visit my blog. Then they will visit the free download page to get the 50 steps for free, and maybe download some more free ebooks and software from that page too.

[Click Here To Download Free Traffic Techniques Report](#)

Get Step By Step Amazing Traffic Videos Click Here

My blog has adsense ads, affiliate program links and many other ways of making me money, so although I am basically giving away this ebook, I am benefiting in many other ways.

Also once a person has my ebook and they begin to resell it, there are links to my website and blog, so I will also gain traffic this way.

You are very welcome to visit my blog where you can grab some free downloads. You should also leave a comment making sure to include your website URL for...you guessed it, FREE TRAFFIC!

Another reason for submitting articles to article directories is that once your article gets published other websites are allowed to use your article content on THEIR websites.

If a website owner decides to put your article on their website, they must include your author's bio box, so this means when people read the article on the other person's website, they will see the link to your website, as will search engines, so as well as getting free traffic you are also increasing the back links to your website which will help your search engine ranking results.

Publishers of Ezines or Online newsletters can also use your article if they include the bio box.

This means that if your article is picked up and sent to the publishers mailing list, your article is going to be viewed by hundreds maybe even millions!

There are also many websites set up that "pull" information from article directories to display on that website. So basically all the website does is display lots of related articles with each author's bio box, it saves the website owner having to write any of their own content.

These websites are usually set up to generate google adsense income or affiliate profits. So your article can again be showing up on thousands of websites with a back link to your website.

If you are interested in having a website filled with pre-written articles or even your own articles, then you can download some free software that will help you create your own article filled website and convert your content into cash, for details [click here](#)

Click Here To Download Free Traffic Techniques Report

Get Step By Step Amazing Traffic Videos Click Here

If you plan on writing lots of articles it can become very time consuming submitting them to thousands of article directories.

There is a fast and highly effective method for doing this on auto pilot, for details [click here](#).

I offer a free ecourse which ultimately deals with writing articles to earn easy cash every day which you are more than welcome to access for free here [100aday](#)

If you would like to download 100 pre-written 'Private Label Rights' articles right now simply [click here](#)

Here is a list of some of the main article directories where you can submit your articles:

<http://ezinearticles.com/>
<http://www.articlecity.com/>
<http://www.articleconnection.com/>
<http://www.articlegeek.com/>

Of course there are literally thousands of websites that you can submit your articles to so have a search on google or yahoo.

You could even search for Article Directories related to your main subject or niche i.e. Dog article sites etc etc.

3. Put your articles on your website

Once you have written your articles, you can add them to your website, for more fresh content which search engines will love.

This will in turn also attract more visitors to your website.

You could announce to your subscribers that you have a new article section on your website and that they can use the articles on their own websites as long as they include a link back to your website.

It's a good idea to change your article slightly so that Google and Yahoo etc don't think it's duplicate content as your website will be penalised for this.

[Click Here To Download Free Traffic Techniques Report](#)

Get Step By Step Amazing Traffic Videos Click Here

You can get article spinners which will re-order your article and basically quickly rewrite it for you.

You can download some free software that will do this for you here:

<http://www.dupefreepro.com/>

4. Write an ebook

Again, once you have written a good amount of articles you could create an ebook or special report from them.

Then you could offer this ebook / report as a free download for signing up at your website.

Or you could really make your ebook viral and offer it to ebook sellers with master resell rights, this means they can resell your ebook, and people who buy it can resell it too.

Remember you will have links inside the ebook to your website, so the more people who see the ebook the better.

You can also submit your ebook to free ebook websites, here are some of the best free ebook websites you can submit to:

<http://www.free-book.co.uk/addurl.htm>

<http://www.free-ebooks.net/submissionForm.php>

<http://www.virtual-ebooks.com/addabook.htm>

<http://ebookdirectory.com/cgi-bin/addurl.cgi>

<http://www.ebookjungle.com/submit.php>

<http://www.ebooksubmit.com/>

<http://www.jogena.com/ebookdir/ebookform.htm>

<http://www.ebookbroadcast.com/submit.shtml>

<http://www.mindlikewater.com/submitebook.html>

http://www.ebookslibrary.com/ebook_library_000007.htm

Click Here To Download Free Traffic Techniques Report

Get Step By Step Amazing Traffic Videos Click Here

Of course there are lots more that's just a few.

If you have an ebook with resell rights that you would like me to donate to my subscribers for free visit my website <http://www.sallys-ebooks.co.uk> and click on the contact us link.

Remember you can also search on the internet for more ebook website owners and offer them a free copy of your ebook to give to their subscribers, or even sell to their subscribers.

If you want to make money from your ebook, there are many places you can sell it, one of the best is [clickbank](#), they handle everything for you and provide an excellent service for digital sellers.

Or you could sell your ebook on ebay, thousands of people join ebay everyday so there is a massive audience you can target.

If you would like to sign up to my mailing list to learn how to sell ebooks send a blank email to sallys-ebooks@aweber.com.

There is a great free ebook you can access from the link below which will teach you how to get thousands of ebayers reselling your viral ebooks, and it's well worth a read:

<http://www.sallys-ebooks.co.uk/presents/ebayebookfree/>

5. Start a newsletter

There is nothing more important than list building, if you have people signed up to receive your newsletter, you can send them to your website every day if you choose to do so.

I wish I had discovered the importance of subscriber list building in my early days online as it's a fantastic way of increasing your website visitors and ultimately increasing your online income.

The only Auto responder I ever recommend is [Aweber](#) you can have an unlimited amount of Autoresponders which means if you have more than one website you can have a separate mailing list for each of them.

[Click Here To Download Free Traffic Techniques Report](#)

Get Step By Step Amazing Traffic Videos Click Here

For example,

I have a Private Label Rights Membership Site and for people to sign up they simply add their details on

<http://www.plrebooks.co.uk>

or send a blank email to

plrebooks@aweber.com

I have a Free Giveaway of 5 top traffic building and email newsletter success reports here:

<http://www.inside-ebooks.net/miniebookreports/>

or people can simply send a blank email to

sallyneill@aweber.com

You could create your own mini ecourse like I did on <http://www.100aday.co.uk>, where you can learn how to make \$100 a day in just 3 days, writing reviews and articles, and I also have a separate email list for people to sign up to that list too.

You can have as many different mailing lists as you like, all with different email messages being sent out daily, weekly or even monthly.

In each of those emails, that are automatically sent out, you will have your website link for people to go and visit your website again.

You can have automated emails promoting for certain products on your website, or new additions to your website.

If you imagine Aweber is just like your own personal assistant who will work constantly on your behalf to drive traffic to your website every day, all you have to do is get people to sign up.

Aweber also has the best tool around which is a pop up on your website, if you visit my other website [sallys-ebooks](http://sallys-ebooks.com) you will see a demonstration of this pop up.

Click Here To Download Free Traffic Techniques Report

Get Step By Step Amazing Traffic Videos Click Here

This pop up offers visitors 30 free ebooks to sign up for my newsletter and most people do sign up.

This is a highly effective way of building your mailing list.

For some more highly effective list building tactics [click here](#).

Using a Auto responder ensures a higher probability that your email will be received plus rather than you manually sending emails out to all your customers, you automate the entire process through Aweber, it will probably be the best ever investment you can make for your website.

For a free test drive of how Aweber works [click here](#)

You may be thinking what on earth would I put in my newsletter?

Well remember those articles you are going to write?

You could include those in your newsletter.

You could give away secrets or tips related to your website content.

You could review similar products and tell your subscribers about them and include an affiliate link to buy the product.

Remember it's YOUR newsletter and you know what information your subscribers will enjoy reading.

And each time one of your emails or newsletters go out, watch how your website traffic increases!

It's just like having your own tap full of traffic that you can turn on and off when you choose!

6. Get a Blog

A blog can be another free way to get traffic to your website and they are simple to set and free!

Like I just mentioned, you can set up a free blog at <http://www.blogger.com/> or <http://wordpress.com/>

[Click Here To Download Free Traffic Techniques Report](#)

Get Step By Step Amazing Traffic Videos Click Here

These are the two major blog sites and both are excellent.

Then you can post your articles on your blog, your blog will link back to your website, more free traffic for you.

Again you can list helpful hints or tips, how to guides, review other products, or just add any content related to your website content.

Remember to add a link to your website in all your blog posts! Then when a person reads your blog they will almost certainly visit your website too.

There is an excellent ebook titled Blogging All the Way to the bank and I highly recommend if you are considering starting a blog you get a copy, details [click here](#).

It's very important that you "ping" your blog each time you add a new post. You can use <http://pingoat.com> or <http://autopinger.com/> and these websites will update lots of blog related services about your new post.

Remember you can also use a site called Blogitive <http://www.blogitive.com/>, basically this site will allow to you either make money from your blog very simply or become a sponsor.

If you choose to advertise on your blog, you will be paid to write a review on another person's website and add a link to their site in your blog.

If you choose to become a sponsor, you will pay other bloggers to review your site or products and link back to your website.

Simply visit <http://www.blogitive.com/> to find out more details.

7. Use other peoples blogs for free traffic.

If you don't want to start your own blog you can easily use other peoples blogs to send traffic to your website.

Search on Google or your favourite search engine for blogs related to your website content.

Then visit each blog and read the posts, leave comments on them if you are allowed to do so and also add a link to your website.

[Click Here To Download Free Traffic Techniques Report](#)

Get Step By Step Amazing Traffic Videos Click Here

When people visit the blog, they will read your comment and if they find it useful or helpful they will in turn visit your website.

Try and make your comment genuine and contribute to the post topic in some way, you should also remember that due to spammers, many blog owners will approve comments added to their blog, so if your reply looks like a sales pitch it will probably be rejected and never appear on the blog.

There are literally millions of blogs on the internet so I'm sure you will be able to find a good amount to which you can post comments or replies on and divert some of the blog's traffic back to your own site.

8. Using ebay

Like I said before thousands of people register on ebay every day, and there are already millions of members world wide.

There are several ways you can use ebay to drive free traffic to your website. Ebay does not allow you to directly link to your website from each auction but they do allow you to place a link on your "Ebay About Me Page".

Create a professional ebay about me page and each time someone views it they will surely visit your website. Remember you can't actually link to your website from your auctions, but you can invite viewers to view your about me page, just add a simple link in each of your auctions with a link to your about me page.

You can also add a line to say if auction viewers have any questions they can contact you by email here questions@yourwebsitename.com now most people will be clever enough to figure out that you have a website called yourwebsitename.com and go visit it.

9. Follow up ebay and other sales

You should follow up every single sale you make on ebay or from your website with a polite email.

[Click Here To Download Free Traffic Techniques Report](#)

Get Step By Step Amazing Traffic Videos Click Here

Simply ask the buyer if they received their purchase without any problems, and of course you will sign off the email with your name and your website name.

You could even add a ps. to tell them to sign up for your newsletter or to tell them about a special offer you have on your website.

Remember this person has already bought something from you, so they trust you and are more likely to visit your website.

10. Ebay Shop

Once you start selling your product successfully on ebay you will eventually want to upgrade to an ebay store or shop.

It's a small cost each month and you can list items for cheaper and for longer.

You should note that ebay shop items receive less exposure than a normal ebay auction item. But if your item is rare it will still be shown in ebay search results.

Also when you have an ebay shop you can have your own newsletter which can be sent out when you have added new items to ebay, people simply sign up to receive it.

You could add a link in all your ebay auction items telling people to sign up for your newsletter and also put a link on your ebay about me page.

You can even name your shop something similar to your actual website name, so your are building a brand.

Don't try and use your actual website domain name as your eBay id, eBay frown upon this and you will get suspended.

So take some items from your website and list them on ebay, then you really will be able to get lots of free targeted traffic to your website.

Click Here To Download Free Traffic Techniques Report

11. Get other ebayers to promote your items for you

Ebay allow you to cross promote items with 10 other ebayers.

This means that after a sale, ebay will show both your items and your promotion partners items to the buyer, so you can have the chance of your items being shown when each of your 10 cross promotion sellers make a sale too.

Choose sellers who sell similar or related products so you know their buyers will also be interested in the items you have for sale.

Simply search on ebay for help on how to cross promote with other ebayers.

12. Advertise in related ezines / newsletters

A quick search on google or yahoo will give you some ideas for finding related ezines or newsletters to place ads in.

Most websites now have a mailing list or ezine which they may let you advertise in for free.

You could ask them to publish one of your articles and include a link to your website. They are getting some free content and you are getting some free exposure.

Or you could offer them some free advertising in your newsletter or mailing list in exchange for them doing the same for you.

You will never know unless you ask, so find related ezines or websites, contact the owner and ask nicely!

Remember that the people who have subscribed to the owner's newsletter are already interested in your website content to that's a great way of attracting free targeted traffic.

13. Free Ads

Whether it be National or Local there are thousands of free ads sites, where you can promote your website products for no cost.

Again a quick bit of research online and you will find a wealth of free ad websites to drive more traffic to your website.

Get Step By Step Amazing Traffic Videos Click Here

Probably one of the best know free ads provider is [craigslist](#) and most Countries and Cities have their own craigslist where you can post ads and join in forums etc etc.

Just be sure to follow all the rules and you should get a lot of free traffic using this method.

14. Squidoo

Squidoo is a fun online community which allows you to set up a "lens" for products or websites you recommend.

You can have as many "lenses" as you want all promoting your website.

It's really fun, and best of it's FREE to use and will generate you lots of free traffic, social networking at its best!

I highly recommend you download the 5 free Squidoo reports from this page:

<http://www.inside-ebooks.net/squidoo>

Read through them to ensure you squeeze the most out of Squidoo!

15. My Space

If you have not heard of my space where have you been hiding?

It's all the latest rage right now.

Basically you get a page where you can talk about yourself or your website, have links to your website. I think my space is great fun and you can meet a lot of new people and make some friends too.

You can post as many entries as you like, but again follow the rules!

You can find out more about my space here

<http://www.myspace.com>

Click Here To Download Free Traffic Techniques Report

Get Step By Step Amazing Traffic Videos Click Here

You can download a free My Space Secrets Revealed Report from here:

<http://www.inside-ebooks.net/myspace/>

Remember the more links you have all over the internet the more chance your website will get visited, think links, links and more links!

16. Joint Ventures

Joint ventures are exactly that, you find someone with the same content or products as your own website and you do a joint venture with them.

You can bundle some of both your items together and sell them as a special deal package.

You could set up a co-registration with them for getting sign ups, when someone signs up to their list, they promote your list, and when someone signs up to your list you promote their list.

As you will both have similar visitors to each of your websites, it's very likely people will want to join both of your lists.

This is very popular method used on ebay by ebooks sellers, basically, say you write an ebook about how to stop mosquito bites, you then search on ebay for people selling mosquito repellent or mosquito nets, anything related to mosquitoes and you ask them if they would give your ebook to their customers for free in exchange for your placing a link to their website or ebay shop in your ebook.

I have done this many times very successfully!

It's really easy to write a short ebook specifically for this purpose, then find ebayers willing to give your report away for free, many will be happy to do this as it will enhance their product and give their customers an extra bonus for their money.

You can even set up a special download page that the ebay sellers will refer their buyers to in order for them to get their free download of your ebook, and guess what will be on that page?

Your sign up form, some more free bonuses and more importantly a link to your website!

Click Here To Download Free Traffic Techniques Report

17. Press release

A press release is simply an announcement of some sort.

You can announce a service you provide, a new special offer on your website, a new product you are releasing etc etc.

A carefully planned Press Release can drive lots of targeted to your website.

Who knows your press release might even end up on a local or even national journalist's desk and then you really have hit the jackpot.

The most popular website for submitting a press release is <http://www.prweb.com/>

A press release can also help you rank highly in the search engines for your targeted keywords, for a simple quick guide on Press Release Profits click the link below:

<http://www.sallys-ebooks.co.uk/download/pressreleasePR.zip>

This ebook is short and sweet but it clearly teaches the steps you need to take in order to benefit highly from a well timed and well written press release.

I have spoken with the author and he has allowed me to give you a free download with the purchase of this ebook

The ebook does also come with resell rights, so even if you don't want to read it, there is nothing stopping you from reselling it!

18. Squeeze Pages

A squeeze page is small introductory page to a website that boosts performance by funnelling visitors into interested customers.

Now, you don't have to limit yourself to just one squeeze page I personally have about 5 squeeze pages all for my ebook website.

A squeeze page is primarily used for the purpose of getting email address or sign ups, so how can this drive traffic to your website?

Get Step By Step Amazing Traffic Videos Click Here

It's simple!

You set up several squeeze pages on your website, you target different related keywords on each squeeze page.

For example, say you had a dog related website.

You could have squeeze pages for

Dog Pampering
Dog Training
Dog Health
Dog Food
Dog Fashion

And so on. Now each squeeze page would be filled with relevant keywords. So dog pampering will have words on the page specifically related to dog pampering.

Then when someone surfs the internet looking for dog pampering your site pops up in the results and they in turn visit sign up and or visit your website.

You could have a sign form for your mailing list on each squeeze page or just a link to your main website home page.

Each squeeze page is adding more content to your website and also driving free targeted traffic to your website.

There is some excellent software that will increase your Squeeze Page success simply visit the link below for more details:

<http://www.inside-ebooks.net/squeezepagesuccess/>

19. SEO Search engine Optimisation.

Once you website is fully optimized you will have:

100% free traffic
100% targeted traffic
And its all 100% on auto pilot and hassle free!

Click Here To Download Free Traffic Techniques Report

Get Step By Step Amazing Traffic Videos Click Here

Use alt text
Use images
Use ORIGINAL related content - maximise keywords
Meta tags
Start and end site with keywords

You can download a free copy of Brad Callen's "SEO Made Easy" which includes some excellent seo tips and taught me a huge amount of information about search engine optimization.

<http://www.sallys-ebooks.co.uk/seo/seomadeeasy.zip>

I would also recommend you read The No1 Selling SEO Book if you are truly serious about having your website ranking No1 in Google, again visit the link below:

<http://www.sallys-ebooks.co.uk/seo/>

I continually refer back to "SEO Book" and it's truly one of the best purchases I have EVER made online.

20. Easy Google Videos

Possibly one the easiest ways to get search engine traffic is the use of online videos.

You have seen how popular YouTube became with millions of people worldwide submitting their personal videos. Many online marketers soon realised the potential for online videos and quickly seized the opportunity for more profitable reasons.

The last time I took a look at YouTube's most watched video it had been viewed an amazing 268,777 times, now if that was a video with a link back to your website then you really are laughing all the way to the bank!

But to be honest, there are not that many of us who could make a truly great video and get that amount of views is there?

Of course there is!

Click Here To Download Free Traffic Techniques Report

Get Step By Step Amazing Traffic Videos Click Here

The power of online video is totally amazing and totally unique, the craziest ideas can be a massive hit:

Some random guy singing the Backstreet Boys Hit "I wan't it that way" but changing the Lyrics to refer to Selling on eBay.

Or how about the Stars Wars Kid pretending he had a Light Saber, this video has had a MASSIVE 1,914,061 hits last time I looked!

Now I know as an online marketer you are not going to try something like that (but feel free to do so if you have the talent!) but I am trying to show you just how powerful a simple video can be.

I remember watching Liz Tomey's Google Video Profits for the first time, and it really opened my eyes, especially because Liz always explains every single step.

I love to read or watch anything Liz does, she strips everything down to the absolute bare minimum then builds it back up again in Newbie terms.

She doesn't stuff her reports full of technical terms as a filler, she gives it straight. So if you would like to watch Liz's video tutorials you can see more details here:

<http://www.sallys-ebooks.co.uk/easyvideotraffic/>

21. Reciprocal Links

If you have a website, chances are no one in the world knows it even exists, right now!

I remember the first time I got my Easy Ebook Website, I went to sleep with butterflies in my stomach, awoke the next morning and nervously switched on my pc expecting to see a flood of orders for all the ebooks I was selling.

NOT ONE SINGLE ORDER !

I was shocked at first, then I realised I was the only person in the world that knew about my ebook website!

Click Here To Download Free Traffic Techniques Report

Get Step By Step Amazing Traffic Videos Click Here

So I had to get Traffic to my website to make sales and get sign ups.

I read everything I could find on the internet about getting traffic, and reciprocal linking kept cropping up again and again.

I had to find websites with the same content and swap links with them, this would ultimately help me achieve good search engine rankings too.

Once I started to search for relevant linking partners I found the task really easy, all I did was find one website selling ebooks, then check who they were linking too and go swap links with these websites too.

I think it was on the 2nd day after swapping links I started to see traffic coming to my site from these reciprocal links.

But at times it was tedious and time consuming, so I set myself the easy task of getting at least 5 new links everyday, this didn't take up too much of my time and was an easy goal to achieve.

Now I don't have to go searching for link partners, because my website link is on lots of other peoples websites, I now get reciprocal link exchange requests from other ebook sellers everyday, so my linking is now on auto pilot.

My strategy paid off for me and it can work for you too, just be committed to finding new links every day.

The more times your website links appears on the internet, the more chances it will be found and visited!

If you do not want to do the tedious job of searching for link exchanges for you website, you can try a software package that will make you job a whole lot easier and automate a lot of the processes, simply click the link below for more details:

<http://www.sallys-ebooks.co.uk/seo/seolinking.html>

Click Here To Download Free Traffic Techniques Report

22. Google AdSense Advertiser

There is one free ebook you simply must read if you are considering using the Google AdSense Advertising Program for directing traffic to your website.

It explains every single step in simple terms.

The chapters of the free ebook are as follows:

1. Are you prepared to profit from instant web traffic
2. 10 minutes to instant web traffic
3. Keyword Research Basics
4. How to write ads that attract clicks
5. Tracking ads and landing pages
6. Adwords Keyword Strategies
7. Finding Profitable Markets
8. Finding High Paying AdSense Keywords
9. Finding Profitable Keywords

As you can see everything is included so if you want to download a free copy use the link below:

<http://www.sallys-ebooks.co.uk/adsense/adwordsmadeeasy.zip>

23. Testimonials

Testimonials are an excellent way to get both links and traffic to your website.

Normally when you give a testimonial for a product, the owner of the product will reward you by giving you a link back to your website.

Then people who visit the sales page for the product will read your testimonial and perhaps visit your website PLUS the sales page contains a link to your website, which is great for search engine rankings!

You win on both counts!

Get Step By Step Amazing Traffic Videos Click Here

Anytime you buy anything online offer the seller a truthful and honest review or testimonial of their product, tell them that they are welcome to use it to promote their product so long as they give you a link back to your website.

I have done this many times and very rarely do my testimonials not get used.

Each time you visit a website it's also a good idea to check if the site has a guestbook, this is basically a page online where website visitors can leave comments about their visit, remember you usually get a link back to your site, so this is again useful for generating more traffic.

Each time you do anything online, always be on the lookout for traffic generating opportunities and you will see a dramatic increase in hits to your website.

24. Crazy Advertising

You don't have to stick to the "normal" types of advertising and eBay is one of the best ways to find some crazy / unique advertising methods.

I personally bought advertising on a motor car that was driving across Europe for a Breast Cancer Charity, I paid £20 and I got my www.sallys-ebooks.co.uk printed along the bottom of the motor car.

I thought this was excellent advertising and it was also for a good cause too!

A photograph of the car was also put on a charity website, where lots of people seen my website address so it was money well spent.

I simply searched on eBay for website advertising and stumbled upon the auction.

Try it, have a look on eBay and see if you can find some low cost advertising that will increase visitors to your website.

There are some really weird and wacky ones !!!

25. Offline Advertising

Many people with an online business or website tend to forget about offline advertising which is a shame because there is a wealth of advertising opportunities to be found.

Of course, if you have big bucks then you could advertise in the National Newspapers, but we don't all have that budget to work with, so check costs for local newspapers or even those free newspapers, advertising in those ones won't cost you an arm and a leg.

How about getting some free business cards and giving them out?

You can get excellent high quality business cards from Vista print, last time I ordered some, you got 250 free business cards and all you had to pay for was the postage and packaging.

You could put these business cards in shop windows, on free advertising boards in supermarkets etc etc.

Make your business card interesting, perhaps offer a discount code on it, or maybe a freebie, this will make sure lots of people visit your site.

You could include your mobile / cell phone number on it and if anyone asks for your number simply give them one of your cards!

Every time you make a sale online, if it is a physical product be sure to include your business card, better still opt for some premium business cards with a calendar on the back, I often keep one of them in my purse.

Or you could push the boat out and order some magnetic business cards, you know those ones that people stick on their refrigerators!

Get some t-shirts printed with a wacky slogan and your website address.

Get some car bumper stickers.

Get Step By Step Amazing Traffic Videos Click Here

Get some pens with your website address and give them away for free.

Get some cigarette match boxes printed with your website url.

Sponsor a local football / soccer team or another activity related to your website content / products.

Sponsor the back of local restaurants menus, there are LITERALLY MILLIONS OF LOW COST WAYS TO ADVERTISE YOUR WEBSITE!!!

Think Think Think!

Everyday you have to be thinking of new ways you can generate traffic to your website and one day you will be amazed at the results!!!

Final Note:

Well that's us reached the end of the 25 ways to generate traffic to your website, I hope you create a serious action plan today and start to take the steps required to send the truckload of visitors to your website.

Before you go I have one last free download for you, it's a short and sweet report titled "Amazing Traffic Techniques" but it's straight to the point.
